

500mA 1.2MHz 36V Built in SBD Boost LED Constant Current Driver

XL6101

Features

- Operation Voltage: 2.5V~20V
- Directly Drive 1~10 Series LED
- Shutdown Current: 3uA
- Fixed 1.2MHz Switching Frequency
- 500mA Constant Output Current Capability
- Built in High Frequency Power Transistor
- Built in Schottky Diode
- High Efficiency up to 85%
- Excellent line and load regulation
- EN PIN TTL ON/OFF capability
- Dimming Control Using a PWM Signal in EN PIN
- Built in LED open circuit protection function
- Built in thermal shutdown function
- Device HBM ESD Classification Level Class3A
- Available in SOT23-6 package

General Description

XL6101 is a built in high frequency power transistor and Schottky diode Boost LED constant current driver, fixed 1.2MHz frequency PWM, can support input operating voltage range of 2.5V~20V. XL6101 has high precision constant current output to drive the LED, and built in frequency compensation circuitry allows the use of small external components at a price suitable for lowering the cost of the entire power supply system and reduce the printed circuit board space. The low feedback voltage of 200mV reduces the power consumption of the external sampling resistor, and the EN pin supports both TTL ON/OFF and PWM dimming from 0 to 100%. Suitable for very low quiescent current and ultra-small size applications.

Applications

- Screen Backlight LED Driver
- Wearable Portable Electronic Devices
- Digital Cameras
- PDAs and Other Handheld Devices
- Auxiliary Displays

Pin Configurations

Figure2. Pin Configuration of XL6101

Table 1. Pin Description

Pin Number	Pin Name	Description
1	SW	Power Switch Pin.
2	GND	Ground Pin.
3	CS	Output constant current sense Pin. The CS reference voltage is 200mV.
4	EN	Enable Pin. Drive EN pin high to turn on the device, drive it low to turn it off. Floating is default high. Connect to a PWM signal to achieve LEDs brightness dimming.
5	VOUT	Output Pin.
6	VIN	Supply Voltage Input Pin. XL6101 operates from 2.5V to 20V DC voltage. Bypass Vin to GND with a suitably large capacitor to eliminate noise on the input.

Function Block

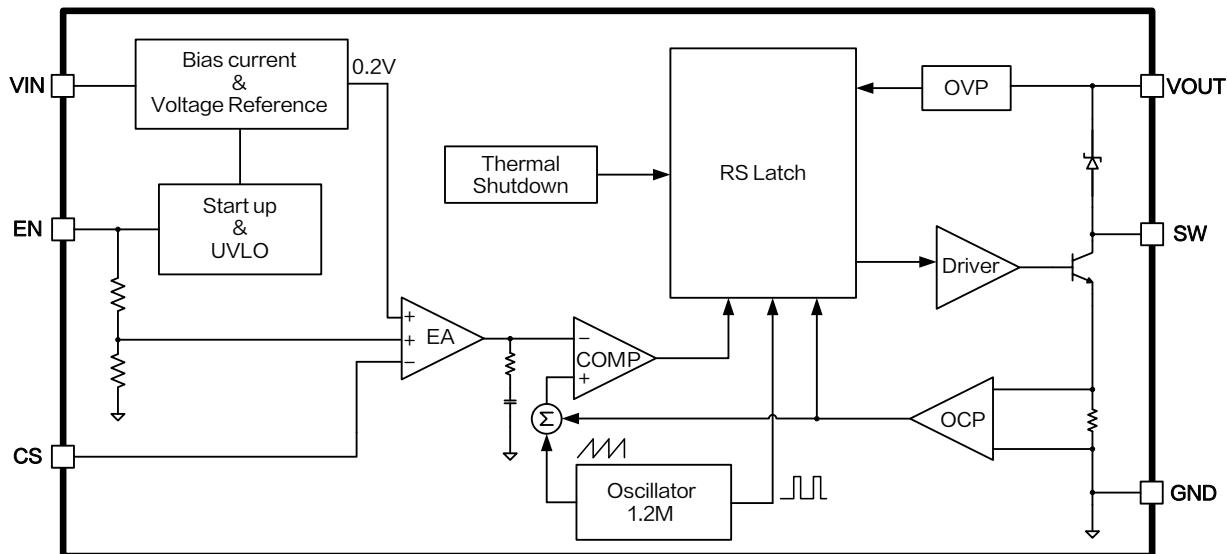

Figure3. Function Block Diagram of XL6101

Absolute Maximum Ratings (Note1)

Parameter	Symbol	Value	Unit
Input Voltage	V _{IN}	-0.3~25	V
EN Pin Voltage	V _{EN}	-0.3~V _{IN}	V
Current Sense Pin Voltage	V _{cs}	-0.3~V _{IN}	V
Switch Pin Voltage	V _{SW}	-0.3~40	V
VOUT Pin Voltage	V _{OUT}	-0.3~40	V
Power Dissipation	P _D	250	mW
Thermal Resistance (SOT23-6) (Junction to Ambient, No Heatsink, Free Air)	R _{JA}	260	°C/W
Maximum Junction Temperature	T _J	-40~150	°C
Operating Junction Temperature	T _J	-40~125	°C
Storage Temperature	T _{STG}	-65~150	°C
Lead Temperature (Soldering, 10 sec)	T _{LEAD}	260	°C
ESD (HBM)		>4000	V

Note1: Stresses greater than those listed under Maximum Ratings may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operation is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.
